Tropic Star Lodge of Panama
HOME OF HIS MAJESTY THE BLACK MARLIN

February 18th, 2003.

To Whom It May Concern:

Tropic Star Group of Panama of world renown Tropic Star Lodge fame presently installs and utilizes "De Bugs" on all of our boats, generators and vehicles with great results.

Due to the remoteness of our Lodge in the Darien Province and as well here in Panama City, we have to be very careful with our diesel fuel. Our businesses are a sport fishing lodge that operates fourteen sport fishing boats with twin diesel engines, as well as diesel power for our electric generators; a purchasing and delivery business with a 65 foot supply boat, and six vehicles; and a fuel delivery and sales company. We use various sizes of "De Bugs" in all of these boats, generators and vehicles and are very happy with the savings we have experienced.

Our engines are running cleaner with less down time for our clients and we have reduced our replacement of fuel filters by more than half. We are also experiencing a reduction in our fuel consumption.

Mike Andrews
